Accessories for the Modus Lavatory System

SHELVES

Material & Construction

The Modus shelves are made from anti-microbial solid surface. AquaDesign's solid surface is a composite material of acrylic polyester polymer resins and aluminum trihydrate fillers. The material is resistant to stains and burns and complies with ANSI Z124.3. Solid surface cleans easily with Scotchbrite®, household cleaners or fine grit sandpaper. The shelves are available in [25 colors](#).

The Modus shelves are supplied with heavy gauge steel mounting brackets.

Anti-microbial

The Modus shelves are manufactured with an anti-microbial agent. The agent is present both on the surface and on the inside of the material and will not dissipate or scratch off. In contact with moisture, anti-microbial ions will be released and effectively kill bacteria.

Standard Equipment

5", 7", 10" or custom length shelf (5" to 30") with heavy gauge support brackets.

Optional Configurations

All shelves longer than 10" can be supplied with an opening for trash. The 6" opening can either be round (-TCR) or square (-TRS) CARRIER PLATE

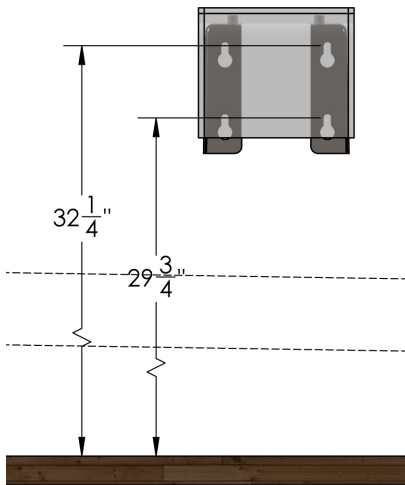

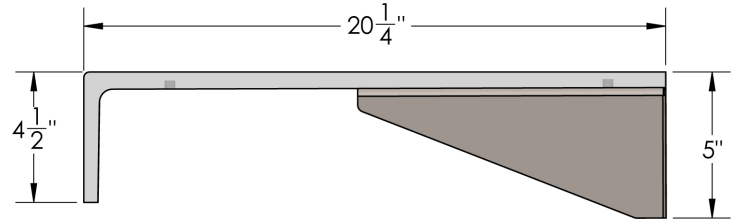

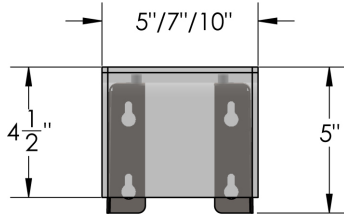

Carrier Plate

The Modus lavatories can be supplied with a steel plate for plate carriers. The plate has the hole pattern conforming for any of the Modus-Vivendi lavatories. One plate is required for the MOD25 and VIV20 lavatories, 2 plates are required for the VIV50 lavatory. Fixture support studs and U-bolts are supplied by others.
